

Deneb Medical S.L. is a start-up based in Miramon, San Sebastian, focused in the development of new disruptive medical solutions. As part of its strategy Deneb is always looking for young brilliant individuals who thrive with new technological challenges and are willing to explore new paths in science, technology and business.

Specifically, we are seeking outstanding young professionals to join our top-class team of ultrashort pulsed laser specialist, experts in medical imaging, optics and MEMS.

Before joining our team, the selected candidates will complete a six-month-training in one of our cutting-edge collaborators in Europe. This training period will be focused in the **development of Advanced Optical Fibre Sensors**.

This is an excellent opportunity for young university graduates who would like to develop their professional career in a high-tech, medical start-up where they will have the opportunity to add real value to the company and take full responsibility of their task. Deneb is also willing to accept graduates who would like to carry out their PhD.

Skills required:

- Fluency in English
- Master's Degree in Physics, Engineering or similar
- Excellent organizational, communication and interpersonal skills
- Proactive, analytical and problem-solver
- Ability to work independently
- A genuine interest for medical science and/or optical technologies will be an asset
